Projects

- **Zomato restaurant**

This project focuses on Data manipulation and Reporting with Power BI.

- Designed and implemented sophisticated DAX formulas to calculate key performance indicators (KPIs)
- Developed optimized data models within Power BI to establish efficient relationships between tables.
- Created interactive and visually appealing dashboards using Power BI's visualization tools, to explore data from various angles and levels of detail.

- **Data cleaning in Sql**

- This project focuses on transforming raw housing data and turning it into more usable for Analysis.
- Designed and executed SQL queries to clean and standardize data, including removing duplicate, convert date format, Splitting Address into Individual Columns (Address, City, State), and delete unused columns.

- **Data exploration in SQL**

- Crafted SQL queries to retrieve and aggregate COVID-19 data from diverse sources, including case counts, percentage of population infected with Covid-19, and vaccination statistics.

Skills

- Good communication
- Interpersonal skills
- CSS,HTML
- Excel (Vlooup,Conditional formatting, Pivot Tables,VBA)
- Microsoft Power BI
- Problem solving
- Statistical analysis
- SQL(Mysql,SQL Server)
- Curiosity
- Critical thinking
- Figma

Personal Details

- Nationality : South Africa

Experience

- **Solrock mining construction** 11 August 2022 - 15 October 2022
Asistant
Deepening project
- **Jonrik mining and engineering** November 2022 - April 2023
Secondary support
Deepening project
- **FLYZY** April 2023 - August 2023
Data analytics Apprenticeship
 - Data Cleaning
 - Data visualization
 - Analysing data using PowerBi and Excel

Education

- **University of western cape** 2018-2021
Bachelor degree in Applied geology
- **Ngwayibanjwa sss** 2014-2017
High school
- **Deviare** 2023
Data analyst with Power bi

Reference

- **Thembokuhle mhlebi - "Deviare "**
